SKILLS

- Java & C++ Programming
- HTML, CSS & JavaScript
- React & TypeScript
- Frontend Development
- Git & GitHub

ABOUT ME

Computer Science Student & Frontend Developer

Third-year Computer Science student at Dilla University specializing in the React and TypeScript ecosystem. I bridge the gap between academic software engineering principles and modern web development, leveraging a strong foundation in Algorithms and RESTful APIs to build accessible, high-performance digital experiences. A dedicated problem-solver committed to continuous learning and delivering user-centered software solutions.

EDUCATION

Computer Science Student ***present***

Dilla University

- **Programming Language**: Proficient in Java and C++, focusing on developing efficient software solutions and robust application logic.
- **Algorithmic Excellence**: Strong foundation in Data Structures and Algorithms, utilized to optimize code performance and solve complex computational problems.
- **System Architecture:** In-depth knowledge of Operating Systems, including process management and memory allocation, applied to low-level system programming.
- **Full-Stack Development:** Experienced in building dynamic applications using HTML5, CSS3, and JavaScript, with a focus on RESTful API integration and responsive UI design.

PROJECTS

- **Digital Learning Platform** (LearnaGo) | React, TypeScript, Vite (In Progress)
- **Wendmamachoch Coffee Shop** | HTML5, CSS3, JavaScript Spearheaded a digital modernization for a local business with a high-speed, mobile-first responsive interface.
- **File Management System** | C++, Data Structures & Algorithms Developed a robust file hierarchy system using custom linked lists for optimized data retrieval.
- **Social Media Dashboard** | Frontend Web Technologies Completed as a Frontend Mentor challenge to master responsive grid layouts and theme switching.

EXPERIENCE & LEADERSHIP

Student Ambassador | Dala / Gebeya Program ***present***

- Serving as a strategic liaison between industry tools and the student body.
- Leading community outreach and managing referral pipelines for tech talent programs.
